Sitting in Hyde Park you can see many a [used BMW in London](#) just driving past. Here in the big smoke, everyone drives a big prestige car. I have counted over 30 Mercedes, BMW and Jaguar within the last twenty minutes. I suppose many celebrities are chauffeur driven around here in these BMW 7 Series limousines with the blacked out windows and in car entertainment systems or 'ICE' as P Diddy sings about in his songs! Apparently he recently bought a massive spec X6 3.0d from Big Motoring World in Kent. I bet it has metallic white paint and 22inch chrome alloys.
